QUESTION 1

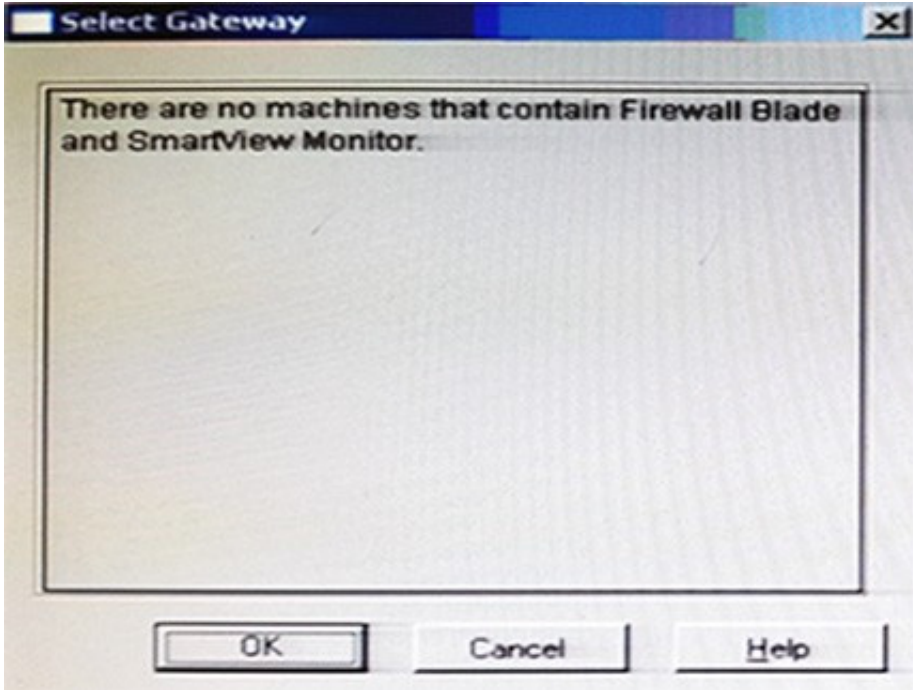

You have just installed your Gateway and want to analyze the packet size distribution of your traffic with SmartView Monitor.

Unfortunately, you get the message:

"There are no machines that contain Firewall Blade and SmartView Monitor".

What should you do to analyze the packet size distribution of your traffic? Give the BEST answer.

- A. Purchase the SmartView Monitor license for your Security Management Server.
- B. Enable Monitoring on your Security Management Server.
- C. Purchase the SmartView Monitor license for your Security Gateway.
- D. Enable Monitoring on your Security Gateway.

Correct Answer: D

QUESTION 2

Which of the following licenses are considered temporary?

- A. Perpetual and Trial
- B. Plug-and-play and Evaluation
- C. Subscription and Perpetual
- D. Evaluation and Subscription

Correct Answer: B

Should be Trial or Evaluation, even Plug-and-play (all are synonyms). Answer B is the best choice.

QUESTION 3

Choose what BEST describes the reason why querying logs now is very fast.

- A. New Smart-1 appliances double the physical memory install
- B. Indexing Engine indexes logs for faster search results
- C. SmartConsole now queries results directly from the Security Gateway
- D. The amount of logs been store is less than the usual in older versions

Correct Answer: B

QUESTION 4

Which policy type is used to enforce bandwidth and traffic control rules?

- A. Threat Emulation
- B. Access Control
- C. QoS
- D. Threat Prevention

Correct Answer: C

Check Point's QoS Solution QoS is a policy-based QoS management solution from Check Point Software Technologies Ltd., satisfies your needs for a bandwidth management solution. QoS is a unique, software-only based application that manages traffic end-to-end across networks, by distributing enforcement throughout network hardware and software.
