QUESTION 1

You are working on a medium sized website for a company that organizes art fairs. On their website, they have three types of pages. One type of page is for recruiting investors in the company. Another type of page is for selling both spaces to artists via ecommerce. And the third type of page is promoting the art fairs to the general public. The company has received feelback that the site is confusing, disorganized, and difficult to navigate through. How can this be corrected?

A. Create separate CCS3 files to organize the information on each type of page.

B. Create and apply a set of custom page templates, one for each type of page on the site.

C. Create a site map that links to all of the assets within the site.

D. Redesign the main page template, and apply it to all forms, blog pages, and ecommerce pages.

Correct Answer: D

QUESTION 2

Which of the following is a recommended method in the W3C standards in the operability category to improve accessibility of a web site on a tablet computer?

A. Provide a virtual magnifying glass that enlarges portions of a website.

B. Placing critical information at the top of the page.

C. Provide adequate contract to make onscreen content visible in bright environments.

D. Provide workarounds for actions triggered by physically moving the tablet.

Correct Answer: B

QUESTION 3

Gabby is meeting with a client to discuss a new web site. She is asking her client a series of questions so

that she can create a site strategy.

Which of the questions below would help Gabby define the site audience?

A. How will users navigate through this site?

B. What kind of users will be visiting the site?

C. What is the most important task for users to complete on the site?

D. How many visitors are expected to visit the site?

Correct Answer: B

QUESTION 4

Dylan is trying to decide where to host his small personal website. He thinks his best option would be to

get a Web site hosting account with an Internet. Service Provider (ISP).

Which of the following is a reason that would support this decision?

A. Hosting with an ISP is the only way to ensure that a site is available to all users worldwide.

B. ISPs often offer a large selection of Web applications at no extra charge.

C. Hosting your site with an ISP ensures your site is validated to W3C standards.

D. An ISP will often block a site from loading if it is self-hosted, due to security concerns.

Correct Answer: C

QUESTION 5

Web development is a collaborative process. Which of the following is an example of a benefit from collaborative design?

A. Customer recognition

B. Increased time for development

C. The ability to show off a skill set

D. Employee satisfaction

Correct Answer: A
