QUESTION 1

Which two attributes are available while enabling a task as a business object for social networking?

A. Task

B. Project Number

C. Task Number

D. Creation Date

E. Project

Correct Answer: AE

To enable a task as a business object for social networking, you need to select the task and the project attributes. These attributes allow you to identify the task and the project it belongs to, and to view the social conversations related to them. Task number and creation date are not available as attributes for social networking. Project number is available, but it is not required to enable a task as a business object. Reference: https://docs.oracle.com/en/cloud/saas/project-portfolio-management/20c/oapfm/manage-project-tasks.html#OAPFM2355891

QUESTION 2

Your organization has been using project class categories and codes for reporting purposes and is set up at the project level. You recently defined a new project type, Capital-Contract, and created new class categories named Build, Operate, and Transfer (BOT) and Build, Transfer, and Maintain (BTM), with class codes of Yes/No. But on creation of a project, you are unable to associate these class categories and codes.

Identify two setups that are mandatory for these class categories and codes to be displayed. (Choose two.)

A. Class codes should be associated with a related set code.

B. Class categories should be assigned to business unit.

C. Class categories should be assigned to project type.

D. Class codes should be assigned to project unit.

Correct Answer: AC

Ref: https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/oapfm/project-foundation-configuration-manage-project-types.html#OAPFM360164 Topic-Associating Project Types and Class Categories: Examples Project classifications group your projects according to categories and codes that you define. When you associate project classifications with project types, the classification is available for selection on projects with that project type. Use any of the following methods to associate class categories with project types: Add a classification to the project type definition For each classification that you associate with the project type, you can enable the Assign to All Projects option to automatically add the classification to the project definition for all new projects with the project type. When this option is enabled, all projects with this project type must be assigned a class code for the class category. Add a project type to the class category definition Enable the Assign to all Project Types option on the class category definition

QUESTION 3

Which four notification templates are predefined?

A. Password Reset Template

B. New Account Template

C. Forgot Password Template

D. Forgot Username Template

E. New Account Manager Template

Correct Answer: ABDE

https://docs.oracle.com/en/cloud/saas/sales/18c/oscus/setting-up-applications-security.html#OSCUS2287154

Predefined Notification Templates

Notification Template

Description

Password Expiry Warning Template

Warns the user that a password is expiring soon and provides instructions for resetting the password.

Password Expiration Template

Notifies the user that a password has expired and provides instructions for resetting the password.

Forgot User Name Template

Sends the user name to a user who requested the reminder.

Password Generated Template

Notifies the user that a password has been generated automatically and provides instructions for resetting the password.

Password Reset Template

Sends a reset-password link to a user who requested a new password. Users can request new passwords by selecting the Forgot Password link on the application Sign In page, or by selecting the Password option on the Preferences page

(Settings and Actions > Set Preferences).

Password Reset Confirmation Template

Notifies the user when a password has been reset.

New Account Template

Notifies a user when a user account is created and provides a reset-password link.

New Account Manager Template

Notifies the user\\'s manager when a user account is created.

When you create a user category, it\\'s associated automatically with the predefined notification templates, which are all enabled.

You can\\'t edit the predefined templates. However, you can create templates and disable the predefined versions. Each predefined event can be associated with only one enabled notification template at a time.

QUESTION 4

You search for resources to fulfill a project resource request but are unable to proceed after receiving the following error message: "The search for resources cannot be completed because the project resource search index is not available. Contact your help desk."

Identify the cause for this error message. (Choose the best answer.)

A. The index is not in the process.

B. The index has been built.

C. The index is in the process of being updated.

D. The most recent update of the index finished successfully.

Correct Answer: C

Ref: https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/fapfm/implementing-project-execution-management-applications.html#FAPFM1724547

Topic Submitting the Process to Maintain Project Resource Search Index:

Procedure

Submit the Maintain Project Resource Search Index job set to update the resources that appear on the Search and Evaluate Resources page when a resource manager searches for resources to fulfill project resource requests. The job set

consists of a set of processes that facilitate efficient and rapid searches for qualified resources.

Resource managers can\\'t search for resources or view resource details if the search index isn\\'t available for a project resource request with qualifications or keywords. For project resource requests without qualifications and keywords,

resource managers can search for and evaluate resources based on resource availability even if the search index isn\\'t current or available.

Caution: The search index isn\\'t available if the Maintain Project Resource Search Index job set process fails, or while the process is running.

QUESTION 5

Which three are valid password complexity criteria while setting up password policies? (Choose three.)

A. Complex: At least 8 characters, 1 uppercase, and 1 number

B. Very Complex: At least 8 characters, 1 uppercase, 1 number, and 2 special characters

C. Very Complex: At least 6 characters, 1 uppercase, 1 number, and 1 special character

D. Very Complex: At least 8 characters, 1 uppercase, 1 number, and 1 special character

E. Simple: At least 8 characters and 1 number

Correct Answer: ABD

Password complexity criteria are criteria that determine how strong or secure a password must be for a user account. Password complexity criteria can include requirements such as minimum length, uppercase letters, lowercase letters, numbers, special characters, etc. Three of the valid password complexity criteria while setting up password policies are: Complex: At least 8 characters, 1 uppercase, and 1 number Very Complex: At least 8 characters, 1 uppercase, 1 number, and 2 special characters Very Complex: At least 8 characters, 1 uppercase, 1 number, and 1 special character Simple: At least 8 characters and 1 number is not a valid password complexity criterion while setting up password policies, as this criterion does not meet the minimum security standards for Oracle Cloud applications. Very Complex: At least 6 characters, 1 uppercase, 1 number, and 1 special character is also not a valid password complexity criterion while setting up password policies, as this criterion does not meet the minimum length requirement of 8 characters for Oracle Cloud applications.
