Because of this, your company has issued a new mandate that the Dev compartment must include a quota to allow for use of only 20 VM.Standard2.2 shapes per Availability Domain. Your solution should not affect any other compartment in the tenancy.

Which quota statement should be used to implement this new requirement? (Choose the best answer.)

A. set compute quota vm-standard2–2count to 10 in compartment dev where request.region = usphoenix–1

B. set compute quota vm-standard2–2–count to 20 in compartment dev
