#### QUESTION 1

A customer has a requirement to display BI reports on portal pages. What approach would you suggest?

- A. Develop a custom task flow to render BI data similar to an existing BI report.
- B. Add a BI folder that contains these reports to the Resource Catalog.
- C. Use a report URL in iFrame.
- D. Use Pagelet Producer to register a pagelet for each report.

Correct Answer: B

---

#### QUESTION 2

Which three asset types are used to define the layout and the look and feel of the portal?

- A. Skins
- B. Page Styles
- C. Content Presenter Templates
- D. Task Flow Styles

Correct Answer: BCD

---

#### QUESTION 3

What are the two recommended ways to perform configuration changes post deployment of WebCenter Portal applications for repeated deployments?

- A. using Fusion Middleware Enterprise Manager Control
- B. using WLST
- C. using deployment descriptors
- D. modifying the files for every deployment

Correct Answer: AC

---

#### QUESTION 4

A page template design is being used by all the authenticated pages. The template is designed in such a manner that all the errors arising from the back end or model layer are being displayed in the template

facet.

There is a requirement that some of the pages do not show error messages such as in the above scenario, rather they need to show messages in a pop-up window. How should you design the page template to take care of both types of page requirements?

- A. Create different page templates for both kinds of pages to have different behavior to show error messages.
- B. Keep the template as it is and let developers write their own logic to show the error messages.
- C. Create an attribute in page template. Let developers set it to true from their page if they need to display it on the template or false if they want to show it in a pop-up window. Use this attribute as rendered property for error messages.
- D. Extend the existing page template and add the logic to show the error message on the template and pop-up window based on view ID.

Correct Answer: C

---

#### QUESTION 5

What happens when you turn on ADF skin compression?

- A. It enables ADF to shorten the names of style classes, thereby reducing the file download size.
- B. It enables ADF to compress the generated CSS files, thereby reducing the file download size.
- C. It enables ADF to use sprites instead of images for skins, thereby reducing the number of files downloaded.
- D. It enables ADF to compress the icons and images within the CSS.

Correct Answer: A
