**QUESTION 1**

You are the Office 365 administrator for a company. All employees in the legal department are members of a security group named Legal-Discovery.

You identify the following requirements:

Each member of the Legal-Discovery group must only be able to manage eDiscovery cases they create.

You must use the principle of least amount privilege when granting permissions.

Assign permissions using a default role or role group if one exists.

You need to configure the Legal-Discovery group.

What should you do?

- A. Create a custom role group. Add users to the role group.
- B. Add users to the eDiscovery Manager role group.
- C. Add users to the Compliance Administrator role group.
- D. Add users to the eDiscovery Administrator role group.

Correct Answer: B

eDiscovery Managers An eDiscovery Manager can use the Content Search tool in the Security and Compliance Center to search content locations in the organization, and perform various search-related actions such as preview and export search results. Members can also create and manage eDiscovery cases, add and remove members to a case, create case holds, and run Content Searches associated with a case. An eDiscovery Managers can only access and manage the cases they create. They can't access or manage cases create by other eDiscovery Managers.

QUESTION 4

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You manage an Office 365 tenant.

You need to ensure that user presence information is available to everyone in the organization.

Which Windows PowerShell cmdlet should you run?

- A. Enable-JournalRule
- B. New-RetentionPolicyTag
- C. Start-ManagedFolderAssistant
- D. Set-CsUser

- E. Set-CsPrivacyConfiguration
- F. Set-HostedContentFilterPolicy
- G. Set-MalwareFilterPolicy
- H. Set-MailboxJunkEmailConfiguration

Correct Answer: E

The Set-CsPrivacyConfiguration cmdlet allows you to change a current set of privacy configuration settings, which help determine how much information users make available to other users.
