**QUESTION 1**

What are the different data sources for Appian record types?

A. Database and Process only

B. Database, Process, and Other Web Service

C. Database, Process, Salesforce, and Other Web Service

D. Process and Other Web Service only

Correct Answer: C

**QUESTION 2**

You have been tasked with creating a new expression rule in an application with the acronym ABC. According to Appian best practices, which name is most appropriate?

A. ABCGetUserById

B. ABC_GetUserById

C. ABC_GetUser_byId

D. ABC_get_user_by_id

Correct Answer: B

**QUESTION 3**

In the scrum lifecycle of a project, when should the team agree on the requirements for the Definition of Done?

A. Before getting started on the project

B. During the sprint retrospective

C. During the backlog refinement

D. After the sprint planning

Correct Answer: A

Before getting started, teams need to make important decisions about how the extended team will work together during the project. These include: Scheduling the key ceremonies on a fixed cadence including: daily scrum, sprint planning, sprint review, backlog refinement, sprint review and the sprint retrospective. Design the development workflow and configure the project management tool (e.g. Jira). Define the deployment pipeline and configuration management process. Agree the Definition of Done (DoD) and Definition of Ready (DoR).

**QUESTION 4**

Your team lead mentions that the environment has been performing very slow lately, and the reason is unclear. A process model is consuming a lot of memory, and this could be causing the slowness in the environment.

What are two valid solutions to this issue? (Choose two.)

A. Manually delete processes that have already been completed or cancelled so it does not cause further performance issues.

B. Configure the automatic process clean up so that it does not automatically clean-up processes.

C. Delete processes alter completion or cancellation by configuring the Data Management tab in the Process Model Properties.

D. Archive processes after completion or cancellation by configuring the Data Management tab in the Process Model Properties.

Correct Answer: CD

**QUESTION 5**

You have data from two unrelated tables. Which Appian objects can easily relate data from these two tables?

A. Process Models

B. Expression Rules

C. Custom Data Types

D. Record Types

Correct Answer: D

When creating a Record Type, you can define relationships to other Record Types, which enables you to link data from two or more unrelated tables. This is typically done by creating a foreign key field in the Record Type that references the primary key of another Record Type.
