**QUESTION 1**

A user loaded a repository workspace that flows with the team's stream. The user can see an incoming change for the file CoreClass in the RTC client, but decides to edit this file and check in the change. How does the Jazz SCM handle this situation?

- A. A potential conflict is detected and the user is prevented from checking in the file CoreClass that already has an incoming change.
- B. The conflict for the file CoreClass is detected in the incoming and outgoing change sets and the changes are automatically merged for the user.
- C. A conflict between the incoming and outgoing change sets for the file CoreClass is detected and the conflict is shown in the pending changes view.
- D. The incoming changes for the file CoreClass are detected and the file is automatically set to read-only, preventing the user from accidentally editing it.

Correct Answer: D

QUESTION 2

Management has requested that two RTC evaluation servers and two RTC departmental servers be deployed.

Each RTC server will have a firewall blocking access to jazz.net and requires different installation packages.

What is the correct installation option?

- A. use the Web Installer
- B. use Enterprise Platform Installer
- C. use IBM Installation Manager Repositories
- D. use plain .zip files for the JTS and CCM Application

Correct Answer: C

QUESTION 3

A user needs to import work items into a project area using the RTC Eclipse client. Which file content type can be used?

- A. XML document
- B. Rich Text document

- C. File Interchange format
- D. Comma Separated Value

Correct Answer: C

QUESTION 4

A project administrator wants to give only read access to an SCM component to two separate teams. How can this be done?

- A. Assign read only access to the component.
- B. Assign the component ownership to both teams.
- C. Change the Access Control of the component to the project area.
- D. Create an Access Group with both teams and assign read only permissions for the component to the Access Group.

Correct Answer: B

QUESTION 5

A project manager asks the administrator to restrict user access to the project area to only people on the project.

Where would the administrator go in order to modify this?

- A. Access Groups
- B. Operational Behaviors
- C. Team Area Permissions
- D. Project Area Access Control

Correct Answer: B
