QUESTION 1

Mark uses a table where rows can be added and removed. What does he need to do to make sure items below the table shift down or up in the layout when the form is being filled out?

A. Only the item directly below the table should be positioned relative to the table.

B. All items below the table should be positioned absolute to the table.

C. Each item below the table should be positioned relative to any previous item that is below the table or to the table itself.

D. When Mark uses a table all items below will automatically shift down or up when needed.

Correct Answer: C

QUESTION 2

Which of the following statements regarding XML is TRUE?

A. XML tags are not case sensitive.

B. All XML elements must be lower case.

C. All XML elements must be properly closed.

D. XML documents must have a DTD (Document Type Definition) file.

Correct Answer: C

QUESTION 3

All of thefollowing are accessibility features of the Viewer or Webform Server EXCEPT which one?

A. Can define text to be spoken by a narration tool.

B. Can enable a focus indicator

C. Can change the background color of the focused item

D. Can enable high contrastmode

Correct Answer: C

QUESTION 4

Jack wants to create a wizard-like form to help guide the user through the form indiscrete steps. Before submitting, the user should see a traditional page. What is the recommended approach to display the wizard form pages as a traditional form?

A. Start by dragging the form wizard widget onto the design canvas. Specify the number of wizard pages. Create UI elements on each of the wizard pages. Create a new page and copy items from the wizard page to the traditional page(s).

B. Start with a new form and create the traditional form page(s), drag the form wizard widget onto the canvas, specify the number of wizard pages. Then select UI elements on the traditional page(s), right-click and select the desired wizard page from the "Form Wizard" menu option which will copy them to that wizard page.

C. Jack needs to create a traditional form first and then export the data model. The data model is then imported into a wizard template form.

D. Add all your UI elements to traditional page(s), select "Create Form Wizard" in the menu, and specify the number of pages. Items on the traditional page(s) will be copied to wizard pages automatically.

Correct Answer: B

QUESTION 5

Which of the following XForms items/events CANNOT be used to trigger an XForms action?

A. Button item.

B. A change inthe XForms model.

C. DOMActivate event.

D. ButtonActivate event.

Correct Answer: D
