**QUESTION 1**

A customer who recently purchased an HPE 3PAR StoreServ 9450 wants to integrate their File Persona services with HPE StoreOnce.

Which feature or license does the customer need to purchase in addition to HPE StoreOnce storage?

- A. Recovery Manager Central software license
- B. No additional license is needed. The product comes with all-inclusive license
- C. Micro Focus Data Protector
- D. HPE 3PAR All-inclusive Single-storage upgraded to a Multi-storage license

Correct Answer: A

---

**QUESTION 2**

What is the cache operation state for the volumes participating in a unidirectional Peer Motion workflow at the Admit stage?

- A. Persistent Cache enforced on the source array
- B. Mirror Cache on the destination array
- C. cacheless on the source array
- D. cacheless on the destination array

Correct Answer: B

---

**QUESTION 3**

What is the benefit of using HPE 3PAR StoreServ and HPE Recovery Manager Central with HPE StoreOnce? (Select two.)

- A. Each backup completes at the speed of a differential backup and restores as a traditional full restore.
- B. The HPE Recovery Manager Central agent in each host provides self-service data protection.
- C. They provide rapid and non-disruptive online recovery.
- D. Each backup is deduplicated in the 3PAR array prior to a restore, for an application-consistent restore result.
- E. Each backup can be restored via a synthetic full image.

Correct Answer: AB

---

#### QUESTION 4

What does RMC do to retrieve a data set that is no longer available within the HPE 3PAR snapshot? (Select three.)

- A. It creates a clone R/O snapshot virtual volume using Catalyst Copy from StoreOnce Catalyst Store.
- B. RMC performs a Catalyst Copy over Ethernet via the 3PAR File Persona port from StoreOnce.
- C. RMC performs a block comparison between Express Protect Backups.
- D. RMC performs a Peer Copy from StoreOnce to a child snapshot virtual volume in 3PAR.
- E. The child snapshot is then attached/mounted to a host to recover the files.
- F. It creates a child R/W snapshot on the 3PAR.

Correct Answer: BDE

#### QUESTION 5

DRAG DROP

Arrange the process of HPE RMC-3PAR application data protection in the right order.

Select and Place:

#### Application Data Protection

#### Order

- RMC leverages unique HPE 3PAR SnapDiff block-change detection technology to send only unique changed data to HPE StoreOnce, using multi-streaming for faster backup.
- HPE StoreOnce deduplication reduces backup storage requirements and enables cost-effective, reliable retention.
- HPE StoreOnce ingests changed blocks to create deduplicated, independent, synthetic full image backup.
- The application owner triggers backup using the native interface/utility.
- The application quiesces momentarily while a consistent, non-disruptive snapshot is created on HPE 3PAR.

Correct Answer:

### Application Data Protection

### Order

HPE StoreOnce deduplication reduces backup storage requirements and enables cost-effective, reliable retention.

HPE StoreOnce ingests changed blocks to create deduplicated, independent, synthetic full image backup.

The application quiesces momentarily while a consistent, non-disruptive snapshot is created on HPE 3PAR.

The application owner triggers backup using the native interface/utility.

RMC leverages unique HPE 3PAR SnapDiff block-change detection technology to send only unique changed data to HPE StoreOnce, using multi-streaming for faster backup.
