**QUESTION 1**

Which of the following should you do in order to add another product attribute to the condition in a shopping cart price rule?

- A. Mark the attribute as "Use for Promo Rule Conditions" on the attribute management page in the admin.
- B. Override Mage\_SalesRule\_Model\_Rule\_Condition\_Product and modify the protected variable `$_ruleAttributes`.
- C. Create an observer on the load sales rule product attributes event.
- D. Add another child to the configuration node `global/catalog/attributes_to_use_in_sales_rules`.

Correct Answer: A

---

**QUESTION 2**

You want to display a grid for a custom collection. After extending `Mage_Adminhtml_Block_widget_Grid`, which two of these methods should you implement? (Choose two)

- A. `_getCollection ()`
- B. `_prepareCollection ()`
- C. `_prepareColumns ()`
- D. `toHtml ()`
- E. `render ()`

Correct Answer: BC

---

**QUESTION 3**

Which three of the following conditions are used to protect an admin route via ACL? (Choose three)

- A. You have defined an ACL in your module configuration
- B. At least one admin role must have permission for that route
- C. You have extended the controller from `Mage_Adminhtml_Controller_Action`
- D. You have defined a method `_isAllowed` which checks the permission
- E. The route name must start with admin

Correct Answer: ACD

---

**QUESTION 4**

You are implementing an observer Method for the event controller\_action\_predispatch, and \$action contains the action controller passed via \$observer->getControllerAction 0. You want to display the customer/account/login page instead of the currently requested one.

Which three of the following methods successfully accomplish this? (Choose THREE)

- A. `$action->getResponse()  
->setRedirect(Mage::getUrl('customer/account/login'));`
- B. `$action->setForward('login', 'account', 'customer');`
- C. `$action->setRedirect('customer/account/login');`
- D. `$action->getResponse()->setForward('login', 'account', 'customer');`
- E. `$action->setRedirectWithCookieCheck('customer/account/login');`

A. B. C. D. E.

- F. `$action->getRequest()  
->setDispatched(false)  
->setFullActionName('customer_account_login');`
- G. `$action->getRequest()  
->setDispatched(false)  
->setActionName('login')  
->setControllerName('account')  
->setModuleName('customer');`

F. G.

Correct Answer: AEG

**QUESTION 5**

Which statement describes a model class that extends Mage\_Core\_Model\_Abstract?

- A. The model class consists of properties and methods for storing and manipulating data retrieved via separate resource classes responsible for database operations.
- B. The model class is responsible for loading the frontend layout templates and responding to page requests via its Action methods (for example, indexAction).

C. The model class does not encapsulate any logic except for logic providing access to the data loaded from the database.

D. The model class is primarily responsible for direct query operations such as retrieving and storing data and then rendering that data to the frontend view.

Correct Answer: A
