**QUESTION 1**

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is implementing inventory management in Dynamics 365 Supply Chain Management.

The company needs to block inventory and ensure that physical inventory will not be reserved by other outbound transactions.

You need to select the appropriate option to block the inventory in the system.

Solution: Configure a blocking cause in the inventory setup configuration.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

---

**QUESTION 2**

You need to set up the procurement category hierarchy in accordance with company policy. What should you do?

A. Add four nodes to the category hierarchy, one for US, one for Hungary, one for California, and one for Colorado.

B. Create category hierarchy nodes per each country underneath the consolidated legal entity.

C. Add three nodes to the category hierarchy, one for Hungary, one for California, and one for Colorado.

D. Create a procurement category hierarchy and assign purchase policy per legal entity only.

Correct Answer: D

---

**QUESTION 3**

A manufacturing company uses 365 Supply Chain Management.

The procurement manager updates the minimum stock levels by using the safety stock journal. The manager encounters a setup error while calculating the proposal for the minimum inventory level by using the service level option.

You need to identify the cause of the error.

What is the cause of the error?

- A. The Multiplication factor value was left blank
- B. The use the calculated minimum quantity the new minimum quantity option was not used.
- C. The Lead time margin was left blank
- D. The Calculate standard deviation option was not used while creating the journal lines.
- E. Safety stock journal lines were created by including the current month's transactions

Correct Answer: D

#### QUESTION 4

DRAG DROP

You need to configure the system for the new products that the company produces.

Which product type should you use? To answer, drag the appropriate product types to the correct products. Each product type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

#### Product types

- Product
- Product BOM
- Product variant
- Product attribute

#### Answer Area

##### Product

Clothing item 01001-S-Red

Energy drink item 02001-12oz

##### Product type

Correct Answer:

### Product types

  
  
  

### Answer Area

#### Product

Clothing item 01001-S-Red

Energy drink item 02001-12oz

#### Product type

#### Box 1: Product

Current environment. Items

Product numbering

All items are numbered by using a smart numbering format: [Product SKU+Size+Color+Style]. For reporting, items are queried for sales and inventory reports by using the first six digits of the item number or until the first dash is encountered.

A t-shirt could be 01001-S-Red for item 1001 in a size small with the color red.

A single energy drink could be 02001-12oz or 02001-20oz for the different sizes that product 02001 is sold in.

Product attributes

All clothing shares the same set of product attributes.

Supplements may share the same Product SKU but can have different attributes for the different size, color, or style variations of the product.

Product attributes that are unnecessary for an item should be excluded from the item.

#### Box 2: Product variant

Product masters and product variants

In an agile world, where products must be quickly adapted to customer requirements, product definitions specify a set of products instead of distinct products. In Supply Chain Management, those generic products are known as product

masters. Product masters hold the definition and rules that specify how distinct products are described and behave in business processes. Based on these definitions, distinct products can be generated. These distinct products are known as

product variants.

A product master is associated with a product dimension group and a configuration technology to specify the business rules. The product dimensions (Color, Size, Style, and Configuration) are a specific set of attributes that can be used

throughout the application to define and track specific behaviors of the related products. These dimensions also help

users search for and identify the products.

### QUESTION 5

#### DRAG DROP

A company uses Dynamics 365 Supply Chain Management. The company purchased a high-tech machine that cuts production time in half compared to existing machines.

The new machine must be serviced after 200 finished goods are produced. Downtime for the new machine will impact production and must be planned in advance so the production lead times are adjusted. The service technicians must always

prioritize the new machine repairs over any other repairs.

You need to configure the new machine to prioritize servicing over other repairs.

What should you configure for each requirement? To answer, drag the appropriate configurations to the correct requirements. Each configuration may be used once, more than once, or not at all. You may need to drag the split bar between

panes or scroll to view content

NOTE Each correct selection is worth one point

Select and Place:

#### Configurations

Delays

Asset criticality

Asset counter

Condition assessment

#### Answer Area

##### Requirement

Service the new machine after 200 finished goods are produced.

Ensure service technicians prioritize the new machine repairs.

Correct Answer:

### Configurations

Delays

Condition assessment

### Answer Area

#### Requirement

Service the new machine after 200 finished goods are produced.

Asset counter

Ensure service technicians prioritize the new machine repairs.

Asset criticality
