Following Questions and Answers are all new published by Microsoft Official Exam Center

QUESTION 1

Your company has a Microsoft 365 tenant.

The company sells products online and processes credit card information.

You need to be notified if a file stored in Microsoft SharePoint Online contains credit card information. The file must be removed automatically from its current location until an administrator can review its contents.

What should you use?

A. a Microsoft 365 compliance center data loss prevention (DLP) policy

B. a Microsoft Defender for Cloud Apps access policy

C. a Microsoft 365 compliance center retention policy

D. a Microsoft Defender for Cloud Apps file policy

Correct Answer: A

QUESTION 2

You have a Microsoft 365 subscription.

All users have their email stored in Microsoft Exchange Online.

In the mailbox of a user named User1, you need to preserve a copy of all the email messages that contain the word ProjectX.

What should you do?

A. From the Security and Compliance admin center, create a data loss prevention (DLP) policy.

B. From the Security and Compliance admin center, create a label and label policy.

C. From the Security and Compliance admin center, create, create a label and a label policy.

D. From the Security and Compliance admin center, start a message trace.

E. From the Exchange admin center, start a mail flow message trace

Correct Answer: A

A DLP policy contains a few basic things:

Where to protect the content: locations such as Exchange Online, SharePoint Online, and OneDrive for Business sites, as well as Microsoft Teams chat and channel messages.

When and how to protect the content by enforcing rules comprised of:

Conditions the content must match before the rule is enforced. For example, a rule might be configured to look only for content containing Social Security numbers that\\'s been shared with people outside your organization.

Actions that you want the rule to take automatically when content matching the conditions is found. For example, a rule might be configured to block access to a document and send both the user and compliance officer an email notification.

QUESTION 3

You need to meet the technical requirement for large-volume document retrieval. What should you create?

A. a data loss prevention (DLP) policy from the Security and Compliance admin center

B. an alert policy from the Security and Compliance admin center

C. a file policy from Microsoft Cloud App Security

D. an activity policy from Microsoft Cloud App Security

Correct Answer: D

QUESTION 4

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. You create an Azure Advanced Threat Protection (ATP) workspace named Workspace1. The tenant contains the users shown in the following table.

Name	Member of group	Azure AD role
User1	Azure ATP Workspace1 Administrators	None
User2	Azure ATP Workspace1 Users	None
User3	None	Security administrator
User4	Azure ATP Workspace1 Users	Global administrator

You need to modify the configuration of the Azure ATP sensors.

Solution: You instruct User3 to modify the Azure ATP sensor configuration.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

Only Azure ATP administrators can modify the sensors.

Any global administrator or security administrator on the tenant\\'s Azure Active Directory is automatically an Azure ATP administrator.
