QUESTION 1

View the following exhibit.

Which of the following statements are true based on this configuration setting? (Choose two.)

- A. This setting will enable the ADOMs feature on FortiManager.
- B. This setting is applied globally to all ADOMs.
- C. This setting will allow assigning different VDOMs from the same FortiGate to different ADOMs.
- D. This setting will allow automatic updates to the policy package configuration for a managed device.

Correct Answer: BC

QUESTION 2

What does a policy package status of Conflict indicate?

- A. Policy package configuration has been changed on both FortiManager and the managed device independently.
- B. The policy package reports inconsistencies and conflicts during a Policy Consistency Check
- C. The policy package doesn't have a FortiGate as the installation target.
- D. Policy configuration has never been imported after a device was registered on FortiManager

Correct Answer: B

QUESTION 3

View the following exhibit:

Import Device - Local-FortiGate [root]

Create a new policy package for import.

Policy Package Name	Local-FortiGate
Folder	root
Policy Selection	<input checked="" type="radio"/> Import All (3) <input type="radio"/> Select Policies and Profile Groups to Import
Object Selection	<input type="radio"/> Import only policy dependent objects <input checked="" type="radio"/> Import all objects

An administrator is importing a new device to FortiManager and has selected the shown options.

What will happen if the administrator makes the changes and installs the modified policy package on this managed FortiGate?

- A. The unused objects that are not tied to the firewall policies will be installed on FortiGate.
- B. The unused objects that are not tied to the firewall policies will remain as read-only locally on FortiGate.
- C. The unused objects that are not tied to the firewall policies in policy package will be deleted from the FortiManager database.
- D. The unused objects that are not tied to the firewall policies locally on FortiGate will be deleted.

Correct Answer: A

QUESTION 4

Which of the following statements are true regarding ADOM revisions? (Choose two.)

- A. ADOM revisions can save the current state of all policy packages and objects for an ADOM.
- B. ADOM revisions can significantly increase the size of the configuration backups.
- C. ADOM revisions can create System Checkpoints for the FortiManager configuration.
- D. ADOM revisions can save the current state of the whole ADOM.

Correct Answer: AB

QUESTION 5

View the following exhibit: Which of the following statements are true if the script is executed using Device Database option? (Choose two.)

Create New Script

Script Name: [\[View Sample Script\]](#)

Comments: 0/255

Type:

Run script on:

Script details

```
config router prefix-list
edit public
config rule
edit 1
set prefix 0.0.0.0/0
set action permit
next
edit 2
set prefix 8.8.8.8/32
set action deny
end
```

[Advanced Device Filters >](#)

- A. The Device Settings Status will be tagged as Modified
- B. Successful execution of script on Device Database will create a new revision history
- C. The script history will show successful installation of script on the remote FortiGate
- D. You must install these changes using Install Wizard to a managed device

Correct Answer: BC
