Name	VDOM	Details
<input type="checkbox"/> Local-FortiGate	root	IP/Netmask:10.0.1.0/255.255.255.0

An administrator has created a firewall address object, Training, which is used in the Local-FortiGate policy package. When the install operation is performed, which IP/Netmask will be installed on the Local-FortiGate, for the Training firewall address object?

- A. 192.168.0.1/24
- B. It will create firewall address group on Local-FortiGate with 192.168.0.1/24 and 10.0.1.0/24 object values.
- C. Local-FortiGate will automatically choose an IP/Netmask based on its network interface settings.
- D. 10.0.1.0/24

Correct Answer: D

QUESTION 2

An administrator removed one of the secondary devices from the FortiManager HA cluster. What change will be pushed by the primary FortiManager device?

- A. FortiManager will remove the secondary device's IP address and serial number immediately from the central management configuration of managed devices.

- B. FortiManager will remove the secondary device's serial number immediately from the central management configuration of managed devices.
- C. FortiManager will remove the secondary device's IP address immediately from the central management configuration of managed devices.
- D. FortiManager will remove the secondary device's IP address from the server-list configuration central management configuration of managed devices.

Correct Answer: A

QUESTION 3

View the following exhibit:

```
FortiManager# diagnose dvm device list
There are currently 1 devices/vdoms managed:
TYPE  OID  SN      HA  IP      Name          ADOM      IPS      FIRMWARE
fmg/   176  FGVM01  -   10.200.1.1  Local-FortiGate  MY_ADOM   8.0..   5.0 MR4 (1011)
faz enabled
      | - STATUS: db: modified; conf: in sync; cond: pending; dm: retrieved; conn: up
      | - vdom: [3]root flags: 0 adom:My_ADOM pkg: [imported]Local-FortiGate_root
```

What of the following statements are true regarding the output? (Choose two.)

- A. Configuration changes have been installed to FortiGate and represents FortiGate configuration has been changed.
- B. The latest revision history for the managed FortiGate does match with the FortiGate running configuration.
- C. The latest revision history for the managed FortiGate does not match with the device-level database.
- D. Configuration changes directly made on the FortiGate have been automatically updated to device-level database.

Correct Answer: BC

QUESTION 4

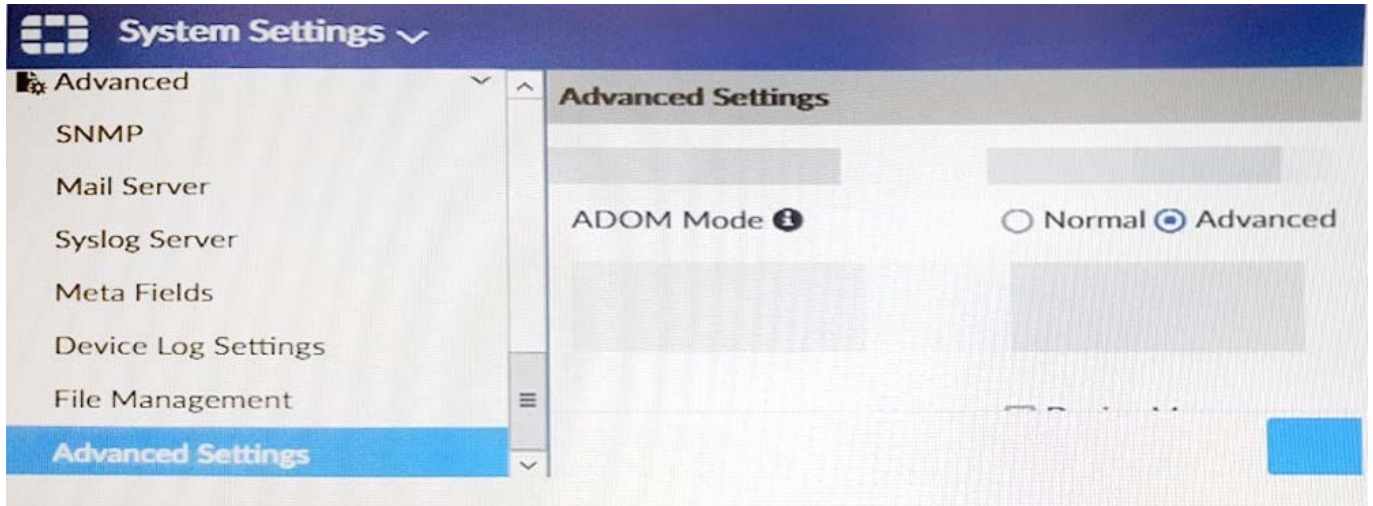

Which of the following statements are true regarding reverting to previous revision version from the revision history? (Choose two.)

- A. To push these changes to a managed device, it required an install operation to the managed FortiGate.
- B. Reverting to a previous revision history will generate a new version ID and remove all other history versions.
- C. Reverting to a previous revision history will tag the device settings status as Auto-Update.
- D. It will modify device-level database

Correct Answer: AD

**QUESTION 5**

View the following exhibit.

Which of the following statements are true based on this configuration setting? (Choose two.)

- A. This setting will enable the ADOMs feature on FortiManager.
- B. This setting is applied globally to all ADOMs.
- C. This setting will allow assigning different VDOMs from the same FortiGate to different ADOMs.
- D. This setting will allow automatic updates to the policy package configuration for a managed device.

Correct Answer: BC
