QUESTION 1

An administrator, Trainer, who is assigned the Super_User profile, is trying to approve a workflow session that was submitted by another administrator, Student. However, Trainer is unable to approve the workflow session.

What can prevent an admin account that has Super_User rights over the device from approving a workflow session?

Session List

View Diff

☐ ID	Name	User	Date Submitt...	Approved/To...	Comments
☑ 1	Firewall p..	Student	2017-06-01...	0/1	firewall policies

A. Trainer is not a part of workflow approval group

B. Trainer does not have full rights over this ADOM

C. Trainer must close Student\\'s workflow session before approving the request

D. Student, who submitted the workflow session, must first self-approve the request

Correct Answer: A

QUESTION 2

Which configuration setting for FortiGate is part of a device-level database on FortiManager?

A. VIP and IP Pools

B. Firewall policies

C. Security profiles

D. Routing

Correct Answer: D

The FortiManager stores the FortiGate configuration details in two distinct databases. The device-level database includes configuration details related to device-level settings, such as interfaces, DNS, routing, and more. The ADOM-level database includes configuration details related to firewall policies, objects, and security profiles.

QUESTION 3

Refer to the exhibit.

An administrator has created a firewall address object, Training which is used in the Local- FortiGate policy package.

When the installation operation is performed, which IP/Netmask will be installed on the Local-FortiGate, for the Training firewall address object?

A. 192.168.0.1/24

B. 10.200.1.0/24

C. It will create a firewall address group on Local-FortiGate with 192.168.0.1/24 and 10.0.1.0/24 object values.

D. Local-FortiGate will automatically choose an IP/Netmask based on its network interface settings.

Correct Answer: B

FortiManager_6.4_Study_Guide-Online In the example, the dynamic address object LocalLan refers to the internal network address of the managed firewalls. The object has a default value of 192.168.1.0/24. The mapping rules are defined per device. For Remote-FortiGate, the address object LocalLan referes to 10.10.11.0/24. The devices in the ADOM that do not have dynamic mapping for LocalLan have a default value of 192.168.1.0/2.

QUESTION 4

View the following exhibit:

Create New CLI Script

[View Sample Script]

Script Name	Config
Comments	Write a comment 0/255
Type	CLI Script
Run Script on	Remote FortiGate Directly(via CLI)

Script Detail

```
config vpn ipsec phase1-interface
edit "H25_0"
set auto-discovery-sender enable
next
end
config system interface
edit "H25_0"
set vdom "root"
set ip 172.16.1.1 255.255.255.255
set remote-ip 172.16.1.254
next
end
config router bgp
set as 65100
set router-id 172.16.1.1
config neighbor-group
```

Advanced Device Filters

Which two statements are true if the script is executed using the Remote FortiGate Directly (via CLI) option? (Choose

two.)

A. You must install these changes using Install Wizard

B. FortiGate will auto-update the FortiManager\\'s device-level database.

C. FortiManager will create a new revision history.

D. FortiManager provides a preview of CLI commands before executing this script on a managed FortiGate.

Correct Answer: BC

QUESTION 5

Refer to the following exhibit: Which of the following statements are true based on this configuration? (Choose two.)

```
config system global
set workspace-mode normal
end
```

A. The same administrator can lock more than one ADOM at the same time

B. Ungraceful closed sessions will keep the ADOM in a locked state until the administrator session times out

C. Unlocking an ADOM will submit configuration changes automatically to the approval administrator

D. Unlocking an ADOM will install configuration automatically on managed devices

Correct Answer: AB
