**QUESTION 1**

Consider the following statements:

1.

Each contracted party is required to act responsibly to the organization and its stakeholders.

2.

All decisions taken, processes used, and their implementation will not be allowed to create unfair advantage to any one particular party.

3.

Digital Transformation and operations will be more effective and efficient.

4.

Strategic decision-making by C-Level executives and business leaders will be more effective.

Which statements highlight the value and necessity for Architecture Governance to be adopted within organizations?

A. 1 and 2

B. 2 and 3

C. 3 and 4

D. 1 and 4

Correct Answer: A

Explanation: Architecture governance is the practice of ensuring compliance with the enterprise architecture and its principles, standards, and goals. Architecture governance provides the means to establish, monitor, and control the architecture development and implementation processes, and to resolve any issues or conflicts that may arise. Architecture governance also ensures that all stakeholders are represented and involved in the decision-making process, and that their interests and concerns are balanced and aligned. Statements 1 and 2 highlight the value and necessity for architecture governance to be adopted within organizations, as they emphasize the importance of responsibility, accountability, fairness, and transparency in the architectural activities. Statements 3 and 4 are more related to the benefits and outcomes of having a good enterprise architecture, rather than the governance aspect. **QUESTION 2**

Consider the following descriptions of deliverables consumed and produced across the TOGAF ADM cycle.

1	General rules and guidelines, intended to be enduring and seldom amended, that inform and support the way in which an organization sets about fulfilling its mission
2	A set of quantitative statements that outline what an implementation project must do in order to comply with the architecture.
3	A document that is sent from the sponsoring organization to the architecture organization to trigger the start of an architecture development cycle
4	The scope and approach that will be used to complete an architecture development cycle

Which deliverables match these descriptions?

- A. 1 Architecture Requirements Specification - 2 Request for Architecture Work - 3 Statement of Architecture Work - 4 Architecture Principles
- B. 1 Statement of Architecture Work - 2 Architecture Principles - 3 Architecture Requirements Specification - 4 Request for Architecture Work
- C. 1 Architecture Principles - 2 Architecture Requirements Specification - 3 Request for Architecture Work - 4 Statement of Architecture Work
- D. 1 Request for Architecture Work - 2 Statement of Architecture Work - 3 Architecture Principles - 4 Architecture Requirements Specification

Correct Answer: D

Explanation: The Request for Architecture Work is a deliverable that is sent from the sponsor and triggers the start of an architecture development cycle. It defines the scope, budget, schedule, and deliverables for a specific architecture project. The Statement of Architecture Work is a deliverable that is produced by the architect and defines the approach and resources needed to complete an architecture project. It forms the basis of a contractual agreement between the sponsor and the architecture organization. The Architecture Principles are a deliverable that is produced by the architect and defines the general rules and guidelines for the architecture work. They reflect the business principles, business goals, and business drivers of the organization. The Architecture Requirements Specification is a deliverable that is produced by the architect and defines the requirements that govern the architecture work. It covers both functional and nonfunctional requirements as well as constraints and assumptions.

### QUESTION 3

Complete the sentence A set of architecture principles that cover every situation perceived meets the recommended criteria of \_\_\_\_\_

- A. consistency
- B. robustness
- C. stability

D. completeness

Correct Answer: D

Explanation: A set of architecture principles that cover every situation perceived meets the recommended criteria of completeness. Completeness is one of the six criteria that should be applied when developing or assessing architecture principles. Completeness means that there are no gaps or overlaps in the coverage of principles across all relevant aspects of the enterprise's architecture. Reference: The TOGAF Standard | The Open Group Website, Section 3.3.7 Architecture Principles.

#### QUESTION 4

Complete the following sentence.

In the ADM, documents which are under development and have not undergone any formal review and approval process are called \_\_\_\_\_. Documents which have been reviewed and approved are called \_\_\_\_\_.

- A. "concept" - "deliverable"
- B. "draft" - "approved"
- C. "Version 0.1" - "Version 1.0"
- D. "draft" - "finalized"

Correct Answer: B

In the ADM, documents which are under development and have not undergone any formal review and approval process are designated "draft". Documents which have been reviewed and approved are designated "approved" in accordance with the organization's governance practices.

#### QUESTION 5

Which of the following best describes the need for the ADM process to be governed?

- A. To enable development of reference architectures
- B. To verify that the method is being applied correctly
- C. To enable a fast response to market changes
- D. To permit the architecture domains to be integrated

Correct Answer: B

Explanation: According to the TOGAF standard, the need for the ADM process to be governed is to ensure that the architecture development and implementation activities are conducted in a consistent, coherent, and compliant manner<sup>1</sup>. Governance provides the means to verify that the method is being applied correctly and effectively, and that the architecture deliverables and artifacts meet the quality and standards criteria<sup>1</sup>. Governance also enables the management of risks, issues, changes, and dependencies that may arise during the ADM process<sup>1</sup>. Some of the benefits of governing the ADM process are<sup>2</sup>: Improved alignment of the architecture with the business strategy and

objectives Enhanced stakeholder engagement and communication Increased reuse and integration of architecture assets and resources Reduced complexity and duplication of architecture efforts Increased agility and adaptability of the architecture to changing needs and requirements Improved compliance and auditability of the architecture outcomes and outputs References: 1: Architecture Governance 2: Architecture Governance Benefits
