**QUESTION 2**

Consider the following statement.

According to the TOGAF standard, a governed approach of a particular deliverable will ensure adherence to the principles, standards, and requirements of the existing or developing architectures.

Which deliverable does this refer to?

- A. The Architecture Vision
- B. The Statement of Architecture Work
- C. An Architecture Contract
- D. The Architecture Definition Document

Correct Answer: C

Explanation: According to the TOGAF Standard, 10th Edition, an architecture contract is "a formal agreement between a service provider and a service consumer that defines the mutual commitments and expectations for the delivery of an architecture" 1. An architecture contract is a governed approach of a particular deliverable that will ensure adherence to the principles, standards, and requirements of the existing or developing architectures, as it specifies the roles, responsibilities, deliverables, quality criteria, and acceptance criteria for the architecture work 1. The other options are not correct, as they are not governed approaches of a particular deliverable, but rather different types of deliverables within the architecture development process. An architecture vision is "a high-level, aspirational view of the target architecture" 1. A statement of architecture work is "a document that defines the scope and approach that will be used to complete an architecture project" 1. An architecture definition document is "a document that describes the baseline and target architectures for one or more domains" 1. References: 1: TOGAF Standard, 10th Edition, Part I: Introduction, Chapter 3: Definitions.

**QUESTION 3**

Which of the following best describes the TOGAF Architecture Development Method?

- A. A process for managing architecture requirements
- B. A process for creating an Architecture Repository
- C. A process for managing and controlling change at an enterprise-wide level
- D. A method for developing and managing the lifecycle of an Enterprise Architecture

Correct Answer: D

#### QUESTION 4

Which section of the TOGAF template for Architecture Principles should describe the relationship to other principles?

- A. Name
- B. Rationale
- C. Statement
- D. Implications

Correct Answer: D

Explanation: The implications section of the TOGAF template for Architecture Principles should describe the relationship to other principles. Implications are statements that describe how a principle will impact other principles, as well as other aspects of the enterprise such as business processes, organizational structures, roles and responsibilities, standards, etc. Implications help to identify potential conflicts or synergies among principles and to assess their feasibility and applicability. Reference: The TOGAF Standard | The Open Group Website, Section 3.3.7 Architecture Principles.

#### QUESTION 5

What should be put in place through organization structures, roles, responsibilities, skills and processes to carry out architectural activity effectively?

- A. An EA Capability
- B. An Enterprise Architecture
- C. An EA framework
- D. An EA repository

Correct Answer: A

Explanation: An EA Capability is the ability of an organization to perform enterprise architecture effectively and efficiently. It involves establishing and maintaining the appropriate organization structures, roles, responsibilities, skills, processes, tools, and governance mechanisms to support the development and use of enterprise architecture. An EA Capability enables the organization to align its business and IT strategies, deliver value from its investments, manage change and complexity, and improve its performance and agility<sup>12</sup> References: 1: The TOGAF Standard, Version 9.2,
