**QUESTION 1**

An IT enterprise proceeds with an SOA initiative that is based on the creation of a single enterprise service inventory. However, conflicts arise when different IT departments disagree on who will own the services and how they will be governed. Which of the following alternative approaches could be chosen to address these conflicts?

- A. The top-down approach is chosen. This allows services to be modeled subsequent to their design, thereby enabling each service to be governed by multiple owners.
- B. It is decided to proceed with the creation of multiple domain service inventories. This allows collections of services to be independently governed by different owners, while still enabling the IT enterprise as a whole to transition toward SOA.
- C. The established "contract last" approach is chosen, allowing different IT managers to focus on contract-related governance issues after the services are deployed and in use.
- D. Because SOA projects absolutely require enterprise-wide standardization and further demand the creation of an enterprise service inventory, the IT managers have no choice than to cancel the project.

Correct Answer: B

---

**QUESTION 2**

A Service Level Agreement (SLA) is a common machine-readable document that is considered part of the technical service contract. Select the correct answer.

- A. True
- B. False

Correct Answer: B

---

**QUESTION 3**

Which of the following SOA myths are false? SELECT ALL THAT APPLY

- A. "An application is considered service-oriented if it uses Web services."
- B. "It is required that you stick with a single SOA vendor platform in order to successfully achieve the strategic goals of service-oriented computing."
- C. "SOA projects always require enterprise-wide standardization and enterprise-wide global data models."
- D. "The successful adoption of SOA will help an organization become more agile and responsive."

Correct Answer: ABC

---

#### QUESTION 4

By applying a strategic scope to the technology architecture, it can be kept in constant synch with how the business evolves over time.

- A. consistently decreasing
- B. middleware-centric
- C. vendor-driven
- D. None of the above answers correctly complete this sentence.

Correct Answer: D

---

#### QUESTION 5

Which of the following statements is false?

- A. A service is a unit of logic to which service-orientation has been applied to a meaningful extent.
- B. Services are designed to increase the need for integration.
- C. Services are the fundamental building blocks of service-oriented solutions.
- D. A service composition is comprised of services.

Correct Answer: B
