QUESTION 1

Do all MHOs need to be upgraded before starting the SGM upgrades?

A. During the upgrade process all SGMs should be upgraded before upgrading all of the MHOs.

B. A minimum of one of the MHOs should be upgraded before starting the SGM upgrades.However, there is no requirement to upgrade all the SGMs during the same maintenance window as the MHO

C. All MHOs must first be upgraded before starting the SGM upgrades However, there is no requirement to upgrade all the SGMs during the same maintenance window as the MHOs.

D. MHOs do not need to be upgraded at all because Maestro supports the use of different versions between the MHOs and SGMs.

Correct Answer: C

QUESTION 2

In case of Correction, where is information about Owner stored?

A. In Correction table of Target Appliance

B. In Connection tables of all Appliances participating in Correction Layer flow

C. In Correction tables of all Appliances participating in Correction Layer flow

D. In Connection table of Target Appliances

Correct Answer: C

QUESTION 3

In what mode do MHOs process traffic?

A. MHOs process traffic in load sharing mode

B. MHOs process traffic in Active-Standby mode

C. MHOs process traffic in Active-Active mode

D. MHOs process traffic in VSLS mode

Correct Answer: C

QUESTION 4

What is the purpose of RJ-45 connectors located at the front panel of the Orchestrator MHO-170?

A. Two Out-of-band interfaces for access to Orchestrator itself

B. 1Gbps connectivity for Security Groups

C. Out-of-band interface for access to Orchestrator itself and Serial Console connector

D. Reserved for internal purposes. Not in use

Correct Answer: C

QUESTION 5

After you import the R81.10 software package, what do you use to verify that it is possible to upgrade an MHO or SG?

A. Run HCP. One of the tests will list upgrade eligibility status for the MHO or SG.

B. Run the Pre-Upgrade Verifier to make sure it is possible to upgrade

C. Nothing. CPUSE will run a verification during the upgrade process to ensure the package is compatible.

D. The package is verified during the import process and a warning or error will be displayed at that time.

Correct Answer: B

QUESTION 6

In a Maestro Dual Site environment, what is the definition of the term Active Site.

A. The Active Site is the site that is not handling any traffic for the specific SG, but itsconnections are synced to its SGMs from the MHOs to be ready in the event of a failover.

B. The Active Site is the site where the SMO Master exists.

C. There is no such thing as an active site. In a Dual Site environment, traffic is load balanced.

D. The Active Site is the site currently handling the enforcement on traffic passing for a specific SG. Connections are synced within the SGMs in the Active Site.

Correct Answer: D

QUESTION 7

Logs without a dedicated log file can be found in

A. /var/log/junk.log.dbg

B. /var/log/messages

C. $RTDIR/log/junk.log

D. $FWDIR/log/fw.log

Correct Answer: B

QUESTION 8
