### QUESTION 13

Your customer has informed you about a possible error in the screen pop-up when receiving a call. The problem is that the edit contact screen pop is shown whenever a call is received but most of the time the calls are regarding open Service Requests. As a result, agents have to navigate to that page, losing time and being ineffective.

What is causing the problem?

- A. Rules do not follow an order. When a call is received, the "edit contact" screen pop appears because it is the default rule that has been selected, regardless of the service request number or other tokens received.
- B. Rules follow a priority order. When the system finds a contact token it automatically opens the "edit contact" page, because that rule has been configured before the Service request rule, regardless if a service Request token is also available.
- C. A configuration in the pages tab of the screen pop is missing, the URL to the page to be displayed has not been provisioned. The URL is empty so the system shows the contact edit page.
- D. Screen pops are not configurable. When a call arrives, the system automatically opens the page of the object in question, these cases being the contact page.

Correct Answer: C
