QUESTION 1

An API product in Apigee can be used to

A. restrict access to a set of APIs

B. configure the quota limits for APIs

C. restrict access to APIs in different environments

D. all of the above

Correct Answer: A

QUESTION 2

Which is true about PostClientFlow?

A. PostClientFlow will only be executed if a payload is returned.

B. The response is blocked until! the PostClientFlow policies are executed.

C. PostClientFlow can only include MessageLogging policies.

D. PostClientFlow can include any supported policy.

Correct Answer: C

QUESTION 3

Which statements ate true when the following policy is used? Select all that are correct.

5ps

A. The rate of 5 per second indicates that 5 requests can be made at any time during a second: but the 6th and later requests dunng the same second would be rejected

B. Spike arrest is calculated separately on each message processor, so you could end up with significantly more than 5 calls in a second

C. It is possible to make fewer than 5 requests in a second and still cause a spike arrest

D. The continueOnError setting means that normal flow processing will resume even if the traffic exceeds the spike arrest rate

Correct Answer: D

QUESTION 4

Which is the recommended solution lo specify a different backend target for each environment?

A. Java/JavaScript/Python callout

B. TargetEndpoint configuration

C. RouteRules

D. TargetServer

Correct Answer: D

QUESTION 5

You have a particularly complicated API proxy in Edge., that uses many variables and conditions You are concerned that the number ot names is quite large, and can become confusing What can you do?

A. Use the period "." to namespace variables.

B. Create a data dictionary describing all the variables

C. Use camelCase variable names instead of snake_case

D. Break the proxy into smaller components using proxy chaining

Correct Answer: C

QUESTION 6

Use a Key Value Map when you need to store

A. a value that expires after 300 seconds

B. OAuth tokens for backend service calls

C. configuration values

D. an HTTP response

Correct Answer: B

QUESTION 7

What is the purpose of a refresh token?

A. To extend the amount of time an existing access token can be used by resetting the token\\'s expiration time

B. To request that Apigee re-issue a new access token to replace an expired access token.

C. To reset an application to its default configuration.

D. To notify the application that a new access token is required.

Correct Answer: B

QUESTION 8

You need to restrict write access to those applications that have been specifically delegated that authority by end users Your project is already using OAuth2 for user and app authentication What should you do?

A. Create a different URL for updates

B. Implement user rights checks in the underlying microservice

C. Use an OAuth2 scope to identify allowed applications and user granted rights

D. Retrieve user rights from a database by inspecting the user id bound to the OAuth2 token

Correct Answer: B

QUESTION 9

Which approaches can be used for extracting data from a SOAP body and returning it as a JSON response in Apigee Edge? Select all that are correct. Choose 3 answers

A. Use XSLT to transform the XML payload and then use a XML to JSON policy

B. Use XML to JSON policy first to convert to JSON and then ExtractVariables with a JSONPath to extract the body from the converted SOAP envelope

C. Use ExtractVariables with an XPath first to extract the SOAP body and then use XML to JSON policy

D. Use an AssignMessage policy to convert the SOAP response to a JSON response, using XPath expressions to retrieve the data

Correct Answer: D

QUESTION 10

You need to access API back-end systems authorized by a machine user credential Each API call must connect to the API back-end system with unique credentials You need to keep user credential info securely protected How should you store the credential?

A. Hardcoded in Assign Message policy

B. Stored in Key-Value Maps and accessed at run time.

C. Stored in configuration files and make use at run time.

D. Stored in encrypted Key-Value Maps and access at run time.

Correct Answer: D

QUESTION 11

Which policy is best used to convert a SOAP response to a JSON response\\'?

A. AssignMessage

B. Message Validation

C. SOAPToJSON

D. XMLToJSON

Correct Answer: B

QUESTION 12

Which features are supported in the OAuthV2 policy? Choose 3 answers

A. Storing of external access tokens

B. Setting custom attributes for generated access tokens

C. Credentials validation when password grant type is used

D. Setting different expiration for refresh and access tokens.

Correct Answer: BCD

QUESTION 13

You have implemented an Apigee Edge API proxy that includes a new shared flow Before you release to production, you need to ensure all dependencies are readied What should you do?

A. Execute static code analysis on the bundle

B. Run automated unit tests in the test environment

C. Deploy the shared flow to the production environment

D. Alert the quality analysis team and product owner that you are preparing the release

Correct Answer: D

QUESTION 14

You are using Apigee Edge as the OAuth Resource Server. The product owner asks you to create an API that logs a user out by revoking OAuth tokens. What should you do?

A. Use the InvalidateToken operation with cascade=true

B. Use the InvalidateToken operation with cascade=false

C. Store a list of revoked tokens in Firebase. On each access, check the list and only allow unrevoked tokens through

D. Store a list of revoked tokens in Key-Value Maps. On each access, check the list and only allow unrevoked tokens through

Correct Answer: B

QUESTION 15

When implementing a node js application in Edge, what is the only supported configuration for running the application?

A. ScriptTarget in a ServiceCallout policy

B. ScriptTarget in a TargetEndpotnt

C. NodeApp policy

D. ResourceURL in a Javascript policy

Correct Answer: A
