**QUESTION 1**

Which functionality is available in Focused Build?

A. User Experience Monitoring

B. Test Management

C. Integration Monitoring

D. Custom Code Management

Correct Answer: B

B is correct because Focused Build provides a test management feature that supports the planning, execution, and reporting of test activities in SAP projects. It allows the creation and assignment of test cases, test packages, and test plans,

as well as the tracking and monitoring of test results and defects.

**QUESTION 2**

A customer with an existing SAP S/4HANA solution is exploring the best approach to move their landscape into the cloud.Which is the most suitable option for the customer?

A. Mix and Match

B. System Conversion

C. Selective Data Transition

D. Lift and Shift

Correct Answer: D

D is correct because Lift and Shift is the most suitable option for a customer who wants to move their existing SAP S/4HANA solution into the cloud. It involves moving the entire system landscape from one environment to another without changing the system configuration or data. Verified References:: SAP Activate Project Management Certification Guide, page 128

**QUESTION 3**

What accelerator can help you document the configuration definition in the Explore phase?

A. Data definition

B. Change request template

C. Test strategy

D. Backlog template

Correct Answer: D

D is correct because the backlog template is an accelerator that can help you document the configuration definition in the Explore phase. The backlog template is a document that contains the user stories that describe the configuration requirements and gaps for each scope item. It also includes the acceptance criteria, priority, effort estimation, and dependencies for each user story. Verified References:SAP Activate Project Management Certification Guide, page 123

**QUESTION 4**

Which of the following are used to perform configuration in SAP S/4HANA Cloud, private edition? (Choose Two)

A. SAP Solution Manager

B. IMG (Implementation Guide)

C. Self Service Configuration Uls (SSCUIs)

D. SAP Central Business Configuration

Correct Answer: BC

B is correct because IMG (Implementation Guide) is a tool that can be used to perform configuration in SAP S/4HANA Cloud, private edition. It provides access to the configuration transactions and activities that are relevant for the project scope. C is correct because Self Service Configuration Uls (SSCUIs) are tools that can be used to perform configuration in SAP S/4HANA Cloud, private edition. They provide a user-friendly interface to configure the settings that are specific to the customer\\'s business needs. Verified References:SAP Activate Project Management Certification Guide, page 131

**QUESTION 5**

From which platform are you able to deploy a trial system within a short timeframe?

A. SAP Support Portal

B. SAP Learning Hub

C. SAP Business Technology Platform

D. SAP Cloud Appliance Library

Correct Answer: D

D is correct because SAP Cloud Appliance Library is the platform from which you can deploy a trial system within a short timeframe. SAP Cloud Appliance Library is a service that allows you to access and provision preconfigured SAP solutions in the cloud, such as SAP S/4HANA, SAP HANA, or SAP Business Suite. You can choose from various cloud providers, such as Amazon Web Services, Microsoft Azure, or Google Cloud Platform, and deploy a trial system in minutes. Verified References:SAP Cloud Appliance Library

**QUESTION 6**

Which systems are part of the private cloud edition landscape?Note. There are 2 correct answers to this question.

A. Production

B. Sandbox

C. Starter

D. Evaluation

Correct Answer: AB

A is correct because Production is one of the systems that are part of the private cloud edition landscape. The Production system is the system where the solution is deployed and operated for the end users. It contains the live data and

processes of the customer\\'s business.

B is correct because Sandbox is one of the systems that are part of the private cloud edition landscape. The Sandbox system is an optional system that can be used for testing, prototyping, or training purposes. It is a copy of the Production

system that can be refreshed on demand.

**QUESTION 7**

What are the responsibilities of the product owner in release and sprint planning? Note: There are 2 correct answers to this question

A. Prioritize backlog user stories by business priority.

B. Define objectives for each release

C. Estimate the backlog user stories.

D. Analyze the functional and technical dependencies between user stories

Correct Answer: AB

A is correct because prioritizing backlog user stories by business priority is one of the responsibilities of the product owner in release and sprint planning. The product owner decides which user stories are more important and valuable for the customer and orders them accordingly in the product backlog. B is correct because defining objectives for each release is one of the responsibilities of the product owner in release and sprint planning. The product owner sets the goals and expectations for each release, based on the customer\\'s vision and feedback, and communicates them to the project team and stakeholders. Verified References:SAP Activate Project Management Certification Guide, page 112

**QUESTION 8**

Which tool do you use to configure SAP S/4HANA Cloud, public edition?

A. IMG (Implementation Guide)

B. SAP Cloud ALM

C. SAP Central Business Configuration

D. SAP Solution Manager

Correct Answer: C

C is correct because SAP Central Business Configuration is the tool that you use to configure SAP S/4HANA Cloud, public edition. It provides a guided configuration process that helps you to activate your system, enter configuration data, and validate your settings. Verified References:Central Business Configuration Overview

**QUESTION 9**

What can you find in the SAP Fiori apps reference library? Note: There are 3 correct answers to this question.

A. Shortcut to the Quicksizer tool to estimate hardware requirements

B. Installation and configuration requirements for selected apps

C. Related app-specific SAP Fiori design guidelines

D. Shortcut to the Maintenance Planner tool to establish the technical update path

E. Related app recommendations based on your usage profile

Correct Answer: BCE

B is correct because installation and configuration requirements for selected apps are one of the things that you can find in the SAP Fiori apps reference library. The SAP Fiori apps reference library provides information on how to install and

configure each app, such as required software components, backend configuration steps, and frontend configuration steps.

C is correct because related app-specific SAP Fiori design guidelines are one of the things that you can find in the SAP Fiori apps reference library. The SAP Fiori apps reference library provides links to the app-specific design guidelines that

describe the user interface and interaction patterns of each app, such as layout, navigation, controls, and dialogs.

E is correct because related app recommendations based on your usage profile are one of the things that you can find in the SAP Fiori apps reference library. The SAP Fiori apps reference library provides suggestions on other apps that

might be relevant or useful for you based on your role, industry, or business area.

**QUESTION 10**

In which phase do you run the User Acceptance Test?

A. Realize

B. Deploy

C. Final Preparation

D. Build and Test

Correct Answer: A

A is correct because in the Realize phase, you run the User Acceptance Test. The User Acceptance Test is a test that verifies that the solution meets the customer\\'s business requirements and expectations. The User Acceptance Test is performed by the end users or key users, who provide feedback and acceptance for the solution. Verified References:SAP Activate Project Management Certification Guide, page 120

**QUESTION 11**

What transition scenarios are possible when adopting RISE with SAP? Note; There are 3 correct answers to this question.

A. Mix and Match

B. Lift and Shift

C. New Implementation

D. Shell Conversion

E. System Conversion

Correct Answer: BCE

B is correct because Lift and Shift is one of the transition scenarios that are possible when adopting RISE with SAP. Lift and Shift is a scenario where the customer moves their existing SAP system to the cloud without changing the code or configuration. It is suitable for customers who want to reduce their infrastructure costs and complexity, and prepare for future innovation. C is correct because New Implementation is one of the transition scenarios that are possible when adopting RISE with SAP. New Implementation is a scenario where the customer sets up a new SAP S/4HANA system in the cloud with predefined configuration and data migration from their legacy system. It is suitable for customers who want to adopt the latest SAP innovations and best practices, and simplify their business processes. E is correct because System Conversion is one of the transition scenarios that are possible when adopting RISE with SAP. System Conversion is a scenario where the customer converts their existing SAP ERP system to SAP S/4HANA in the cloud, while preserving their data and customizations. It is suitable for customers who want to leverage the benefits of SAP S/4HANA, such as improved performance, user experience, and analytics, and retain their existing business processes. **QUESTION 12**

Which collaboration features are available in the SAP Community? Note: There are 2 correct answers to this question.

A. Tweet questions

B. Ask questions

C. Comment on Key Deliverables

D. Update Key Deliverable wikis

Correct Answer: BC

B is correct because asking questions is one of the collaboration features that are available in the SAP Community. The SAP Community allows users to post questions on various topics and get answers from other users, experts, or moderators. C is correct because commenting on key deliverables is one of the collaboration features that are available in the SAP Community. The SAP Community allows users to comment on the key deliverables that are published by SAP or other users, such as blog posts, articles, videos, podcasts, or webinars. **QUESTION 13**

Which of the following considerations apply when determining the project methodology? Note: There are 3 correct answers to this question.

A. Implementation fit

B. Project Manager fit

C. Organizational fit

D. Project fit

E. Solution fit

Correct Answer: ACD

A is correct because implementation fit is one of the considerations that apply when determining the project methodology. It means that the project methodology should match the type and scope of the implementation, such as cloud, on-

premise, hybrid, or mixed scenarios.

C is correct because organizational fit is one of the considerations that apply when determining the project methodology. It means that the project methodology should suit the culture and maturity of the organization, such as its readiness for

change, agility, and innovation.

D is correct because project fit is one of the considerations that apply when determining the project methodology. It means that the project methodology should align with the characteristics and constraints of the project, such as its size,

complexity, duration, and budget.

**QUESTION 14**

Which of the following is a key characteristic of the Agile project approach?

A. Formal and detailed documentation

B. Frequent and detailed project scheduling

C. Iterative build with frequent inspections

D. Frequent quality gates

Correct Answer: C

C is correct because Iterative build with frequent inspections is a key characteristic of the Agile project approach. The Agile project approach follows an iterative and incremental development process, where the solution is built and delivered

in small increments called sprints. Each sprint consists of planning, designing, building, testing, and reviewing activities, where the team inspects the solution and adapts to changing requirements and feedback.

**QUESTION 15**

When conducting an upgrade of an SAP S/4HANA Cloud, public edition three system landscape, in which phase are the Business Roles updated?

A. Explore

B. Realize

C. Deploy

D. Discover

Correct Answer: A

A is correct because in the Explore phase, the Business Roles are updated when conducting an upgrade of an SAP S/4HANA Cloud, public edition three system landscape. The Business Roles are the roles that define the access rights and authorizations for the users in the system. The Business Roles are updated to reflect the changes and enhancements that are introduced by the upgrade, such as new apps, features, or functions.
