A. For high performance and security NAS supports only NFS protocol

B. File system grows dynamically as nodes are added to the NAS cluster

C. For high performance and security NAS supports only CIFS protocol

D. NAS servers are pooled into a cluster of independent NAS nodes

Correct Answer: B

QUESTION 2

Which intelligent storage system component performs replication and storage management functions?

A. Solid state drive

B. Controller

C. Storage class memory

D. Front-end ports

Correct Answer: B

QUESTION 3

What triggers an appropriate work ow upon receiving a service provisioning or management request?

A. Orchestrated operations

B. Alerts

C. Infrastructure discovery

D. Recovery time objective

Correct Answer: A

QUESTION 4

What type of process, when performed on data, would produce the result shown?

A. Deduplication

B. Replication

C. Migration

D. Archive

Correct Answer: A

QUESTION 5

Refer to the Exhibit:

What is the name of the selected backup architecture component?

A. Backup Device

B. Storage Node

C. Backup Client

D. Backup Server

Correct Answer: D

QUESTION 6

What is true about an OSD storage system?

A. Numerous objects can be stored in a single le system folder of OSD.

B. Objects are created based on the name and location of the le.

C. One object can be placed inside another object to save storage space.

D. Objects contain user data, related metadata, and user de ned attributes of data.

Correct Answer: D

QUESTION 7

What type of backup method allows a client to be installed in a VM that sends the data to the backup device?

A. Local replication

B. Image-based

C. Agent-based

D. Synchronous replication

Correct Answer: C

QUESTION 8

Which is a characteristic of RAID 6?

A. Double parity

B. Single parity

C. All parity stored on a single disk

D. Parity not used

Correct Answer: A

QUESTION 9

What method does FCIP use to transport Fibre Channel SAN data?

A. FCIP encapsulates and tunnels FC SAN data over Ethernet networks.

B. FCIP encapsulates and tunnels FC SAN data over IP networks.

C. FCIP splits LAN and FC SAN data and tunnels FC SAN data over Ethernet networks.

D. FCIP separates LAN and FC SAN data and tunnels FC SAN data over IP networks.

Correct Answer: B

QUESTION 10

An Ethernet switch has eight ports and all ports must be operational for 24 hours from Monday through Friday.

However, failures of Port 6 occur within the week as follows:

Tuesday = 6 AM to 8 AM Thursday = 5 PM to 10 PM Friday = 7 AM to 9 AM

What is the MTBF of Port 6?

A. 32 hours

B. 37 hours

C. 30 hours

D. 40 hours

Correct Answer: B
